Laminating process

Templing process

ABOUT US:

In Etalum we have designed, produced and commercialized architectural products made from aluminum and glass since 1993.

Our primary purpose is to satisfy our costumers by offering high quality and fair prices for our products.

Etalum is committed to minimize environmental impact with our products, such as energy saving with our solar control glass. We are focused on the continuous improvement of our processes, including:

- ❖ Electrostatic painting of aluminum profiles.
- ❖ Stainless steel accessories.
- ❖ Tempered glass.
- ❖ Laminated glass.
- ❖ Appropriate assembly.
- ❖ Sandblasting.
- ❖ Insulating glass.

ADS-200

SLIDING DOOR

Our sliding door reference has been designed with high impact resistance and ease of use, ideal for providing divisions of space and allowing natural light and ventilation.

This design can be installed in bedrooms, balconies and patios.

Benefits:

- Resistant to air and water infiltration.
- Noise control.
- Thermally broken frame.

System description:

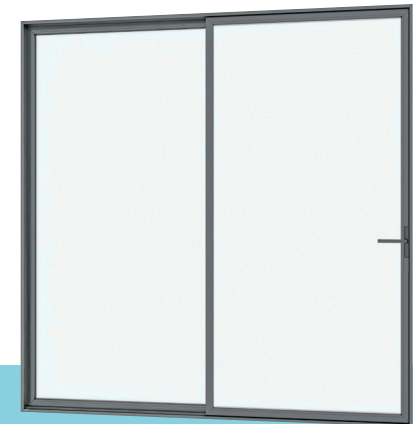

- Solar control glass.
- 90° angle-cut aluminum.
- Thickness of glass from 16mm to 32mm.

Aluminum finishes:

- Champagne
- Black
- Grey
- White

Glass:

- Insulated - Tempered
- Laminated Sentry Glass

SLIDING WINDOW

This window can be adapted to any architectural design giving a manageable style to every space of your home or office.

Benefits:

- Resistant to air and water infiltration.
- Noise control.
- Thermally broken frame.

System description:

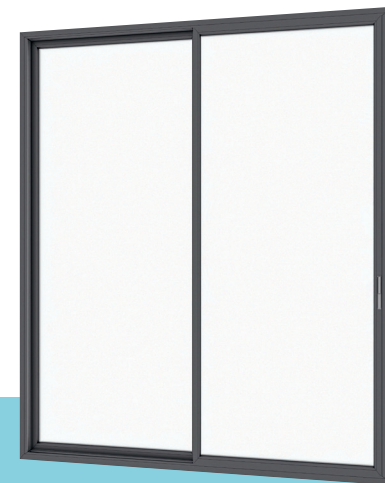

- Solar control glass.
- 90° angle-cut aluminum.
- Thickness of glass from 16mm to 32mm.

Aluminum finishes:

- Champagne
- Black
- Grey
- White

Glass:

- Insulated - Tempered
- Laminated Sentry Glass

The casement window reference ensures an easy and smooth opening, allowing maximum security and ventilation.

This window system can be installed on a wide variety of architectural applications such as residential projects and hotels.

Benefits:

- 🔧 High impact resistance.
- 🛡️ Resistance to air and water infiltration.
- ⚡ Energy efficiency.
- 🔊 Noise control.

System description:

- ☀️ Solar control glass.
- 🦟 Fly screen attachment available.
- 📏 Thickness of glass from 12mm to 24mm.

Aluminum finishes:

- 🍷 Champagne
- ⬛ Black
- 🔵 Grey
- ⬜ White

Glass:

- Insulated - Tempered
- Laminated Sentry Glass

CASEMENT WINDOW

FXG-100

FIXED GLASS

Fixed glass is an easy solution to give spaciousness and light to confined places.

This window system can be installed in residential and commercial construction projects.

Benefits:

- Resistant to air and water infiltration.
- Noise control.
- High impact resistance.

System description:

- Solar control glass.
- Thickness of glass from 12mm to 24mm.

Aluminum finishes:

- Champagne
- Black
- Grey
- White

Glass:

- Insulated - Tempered
- Laminated Sentry Glass

AFD-600

FOLDING DOOR

This reference has a decorative and versatile design, allowing advantage to be taken of every space and providing durability, illumination and maximum ventilation.

Ideal for residential use and interior divisions.

Benefits:

- Resistant to air and water infiltration.
- Noise control.
- High-impact resistance.
- Energy efficiency.
- Easy handling.

System description:

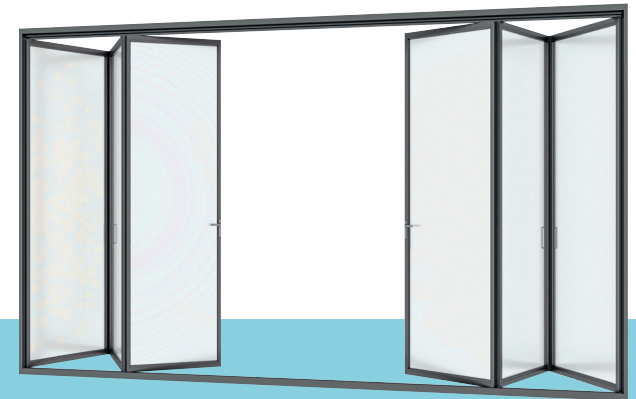

- Solar control glass.
- Thickness of glass from 10mm to 20mm.

Aluminum finishes:

- Champagne
- Black
- Grey
- White

Glass:

- Tempered
- Laminated Sentry Glass

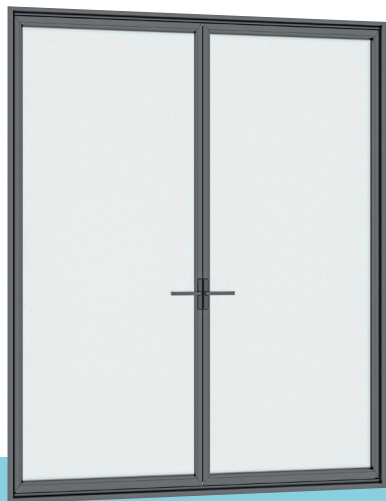

This door is ideal to provide privacy, security and access from one space to another.

Benefits:

- 🔨 High impact resistance.
- 🛡️ Resistance to air and water infiltration.
- ⚡ Energy efficiency.
- 🔊 Noise control.
- 🔒 High tightness
- 👉 Easy handling.

System description:

- ☀️ Solar control glass.
- 🔧 Thickness of glass from 12mm to 24mm.

Glass:

- Insulated - Tempered
- Laminated Sentry Glass

Aluminum finishes:

- Champagne
- Black
- Grey
- White

SIDE HINGED DOOR

SH-100

SINGLE HUNG

Designed for the USA market to meet the most stringent architectural standards.

Benefits:

- 🏠 Suitable for residential and commercial.
- ⚡ Energy saving.
- 🔨 High impact resistance.

Aluminum finishes:

- 🍷 Champagne
- ⬛ Black
- 🌫 Grey
- ⬜ White

Glass:

- Insulated - Tempered
- Laminated Sentry Glass

GOLD-200

SLIDING WINDOW - GOLD

The gold system is our most versatile system. Can be used on both windows and sliding doors. They adapt perfectly to suit your needs and directly result in more practical and comfortable life.

System description:

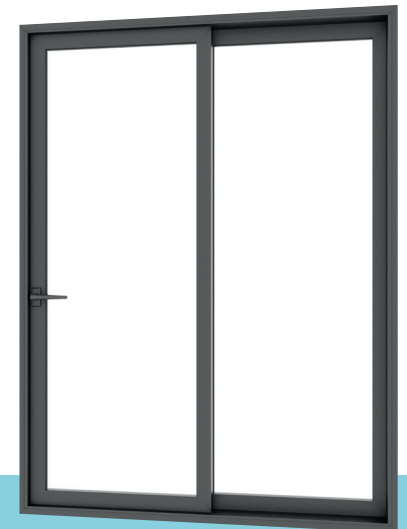

- Profile thickness: 2.0 mm.
- Max weight of glass: 160 kg
- Acoustic insulation.
- Safety.
- Maximum glass thickness: 26 mm.

Aluminum finishes:

- Champagne
- Black
- Grey
- White

Glass:

- Tempered
- Laminated Sentry Glass

This modular system of a prefabricated facade arriving from the factory is the best option for covering large architectural projects.

Its design and ease of installation allow for quick and efficient installation, shorter construction time and lower labour costs. It also provides abundant natural light, noise reduction and thermal insulation, while looking modern and esthetically pleasing.

System description:

- Accessories with high durability.
- High permeability.
- Different shades of glass.
- Easy installation.
- Anchore system allows the facade to resist any building drift in case of seismic forces.

Aluminum finishes:

- Champagne
- Black
- Grey
- White

Glass:

- Insulated - Laminated
- Tempered - Sentry Glass
